- Flutter/React Native (Basic)

## OTHER/TOOLS

- JIRA
- Github/Fork
- Postman/Swagger
- Google Analytics/ Tagmanager
- Figma/AdobeXD
- Ngrok/Netlify/Vercel
- Redux Toolkit/MobX/VueX

## INTEREST

- Front-End Engineer
- Full-Stack Engineer
- SystemAnalyst/BusinessAnalyst

# PAWARIS RABEAB

## SOFTWARE ENGINEERING

### PERSONAL PROFILE

My name is Pawaris Rabeab. I graduated with a bachelor's degree from Chiang Mai University, majoring in Computer Engineering. I currently work as a frontend engineer.

### WORK EXPERIENCE

#### Front-end Engineer

Rapid Group | Sep 2023 - Currently

- Develop Showroom Web with ReactJS, Typescript, NextJS 13/14 app router SSG for SEO, Fetching data from APIs using AXIOS, Plugin tools marketing analyst by Google Analysis, check bot by Google Recaptcha
- Develop an admin and event management systems (Nature of Wisdom) with ReactJ and Tailwind CSS, and manage the state with Redux Toolkit.
- Develop new features and restructure Insurance Web with ReactJS, Redux Toolkit, Tailwind CSS
- Other: System Analyst and Design UX/UI by myself

#### Front-end Engineer

Mungmee | Sep 2022 - Sep 2023

- Develop new features, refactor and fix using ReactJS with NextJS TypeScript and VueJS with NuxtJS TypeScript. I have experience in fetching data from APIs using Axios and effectively managing application state with Mobx. Additionally, I write integration tests using Jest and Cypress
- The workflow using a combination of Git flow and Agile Scrum methodologies. in middle of year transitioned to Trunk-based
- Other: I provided user support for both e-merchant-web and e-order-web, which included making SQL database adjustments. Additionally, I was responsible for managing Google Analytics tags.
- Throughout this journey, I was involved in every stage, from planning to deploying the project to production.

#### System Engineer

Somboon Advance Technology | Sep 2021 - Aug 2022

- Responsibility for Admin & Support.
- Maintain and monitoring IT regulation regarding IT security
- IT vendor management for project and maintenance.
- Responsibility for Network
- Manage plan and tasks of network and IT infrastructure team

### EDUCATIONAL HISTORY

#### Computer Engineering, At Chiang Mai University

Bachelor's degree | Aug. 2017 - May 2021

- Final project - Classroom Attendance Management System (ReactJS)
- A system for monitoring classroom attendance by matching Wi-Fi signals within the classroom with students' mobile devices, capable of generating report logs and tracking students' seating positions.
